PLASTIC OMNIUM ADAPTS ITS ORGANIZATION TO RAMP UP DEVELOPMENT OF ITS INTEGRATED EXTERIOR SYSTEMS OFFER

Plastic Omnium is engaged in a far-reaching transformation of its portfolio of activities dedicated to mobility in all its forms. In just 18 months, it has grown its number of divisions from three to five as well as set-up a new software development activity. With revenue now exceeding the symbolic 10 billion-euro mark, the Group is determined to accelerate and consolidate its global leadership position by developing a unique integrated offer of exterior body panels, lighting and modules.

To meet this goal, Plastic Omnium is adapting its structure as of March 15, 2024:

- Christian Kopp is appointed Senior Executive Vice-President of Plastic Omnium. He will take over as President and CEO of the Intelligent Exterior Systems (IES) division, overseeing the continued implementation of the strategic roadmap while expanding Plastic Omnium's integrated exterior systems offer. He succeeds Stéphane Noël, who is leaving the Group.
- Youssef Souiba succeeds Christian Kopp as President and CEO of the Clean Energy Systems division (CES). He will work at Plastic Omnium's offices in Troy, USA, to support the activity's strong growth in North America. He also joins Plastic Omnium's Executive Committee.

With this organization, the Group underlines its determination to continue with its transformation strategy designed to become even more agile and maximize the benefits of the changing face of the mobility sector, while supporting Plastic Omnium's international growth in the most dynamic markets around the world.

About Plastic Omnium

Plastic Omnium is a world leader in innovative solutions for a unique mobility experience that is safer and more sustainable. Innovation-driven from the outset, Plastic Omnium develops and produces intelligent exterior systems, customized complex modules, lighting systems, energy storage systems, and electrification solutions for actors from every mobility sector. With €11.4 billion economic revenue in 2023, an international footprint of 152 plants and 40 R&D centers, Plastic Omnium relies on its 40,300 employees to meet the challenges of transformations in mobility.

Plastic Omnium is listed on Euronext Paris, compartment A. It is eligible for the Deferred Settlement Service (SRD) and is part of the SBF 120 and CAC Mid 60 indices (ISIN code: FR0000124570). www.plasticomnium.com
